Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

### Office Action Summary

Application No.	Applicant(s)	
10/587,008	WAGNER ET AL.	
Examiner	Art Unit	
Eileen P. Morgan	3723	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS.

- WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.
- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed
- after SIX (6) MONTHS from the mailing date of this communication. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication

 Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any

earned patent term adjustment. See 37 CFR 1.704(b).

Status		
1)⊠	Responsive to communication(s) fil	led on <u>21 July 2006</u> .
2a)□	This action is FINAL.	2b)⊠ This action is non-final.
3)	Since this application is in condition	n for allowance except for formal matters, prosecution as to the merits is
	closed in accordance with the pract	tice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.

Disposition	of	Clai	ms
-------------	----	------	----

<ol> <li>Claim(s) <u>1-9</u> is/are pending in the application.</li> </ol>
4a) Of the above claim(s) is/are withdrawn from consideration.
5) Claim(s) is/are allowed.
6)⊠ Claim(s) <u>1-9</u> is/are rejected.
7) Claim(s) is/are objected to.
8) Claim(s) are subject to restriction and/or election requirement.
Application Papers

## 9) The specification is objected to by the Examiner.

10) The drawing(s) filed on is/are; a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abevance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).	
a)⊠ All b)□ Some * c)□ None of:	

- Certified copies of the priority documents have been received.
- 2. Certified copies of the priority documents have been received in Application No.
- Copies of the certified copies of the priority documents have been received in this National Stage
- application from the International Bureau (PCT Rule 17.2(a)).

See the attached detailed	Office action for	a list of the	certified	copies	not received

#### DETAILED ACTION

#### Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention,

Claims 1-9 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is an aggregation of elements not structurally related. Claim 1 lists elements, i.e. grinding wheel, bearing block, feed carriage, guide means, etc, but does not structurally relate one element to another. Is the 'feed carriage' the same as he 'transverse carriage'? Iine 3, which is 'driven' refers to what? 'and comprises' refers to apparatus or grinding wheel? What comprises the bearing block, the feed carriage etc.? 'the grinding device' lacks antecedence. It is unclear how the bearing block, feed carriage, guide means, adjusting device relate. Claim 1, last 3 lines are unclear. 'with the help of is unclear. what is the 'grinding intervention'? this is unclear. How does the intervention have a position? (same for claims 6 and 7) How does this relate to length of ski? What is ski.2.? Claims 1, 3, 5, 6, 9 all recite limitations that 'can be...' this phrase 'can be' renders the claim indefinite since it is not a positive limitation. Claim 7, 'the feed speed' lacks antecedence. Claims 8 and 9, 'the control parameters' lack antecedence. what are they 'respective' to?

Application/Control Number: 10/587,008

Art Unit: 3723

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior at are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-9, as best understood, rejected under 35 U.S.C. 103(a) as being unpatentable over WO 98/04384 in view of Wirz-5954568.

WO-'384, as best understood, discloses the claimed limitations of an apparatus for machining an edge of a ski comprising: a CNC programmed machine having a cup shaped grinding wheel (1), driven by a motor (2) about a rotational axis extending transversely to direction of feed (Abstract), a bearing block (7), a feed carriage (12). WO'384 does not show a second carriage with a guide that is angularly adjustable. However, Wirz teaches a CNC grinding device having two feed carriages for linear movement (36,37) and a carriage (39) having a guide (40) that is angularly adjustable to be programmed for precisely aligning grinding device relative to workpiece. Therefore, it would have been obvious to one of ordinary skill in the art at time invention was made to provide WO'384 with a second carriage having a guide means that is angularly adjustable, as taught by Wirz, in order to precisely align grinding wheel relative to ski edge for optimum machining.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eileen P. Morgan whose telephone number is Application/Control Number: 10/587,008 Page 4

Art Unit: 3723

571.272.4488. The examiner can normally be reached on Monday-Thursday, 7am-

3:30pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Joseph Hail can be reached on 571.272.4485. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

you have questions on assess to the rimate rimit bystom, somation and Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
